

AUTOCLEAR 200220

2.0m x 2.2m Cargo X-ray

Available operator table and dual or LCD monitors (one 17" CRT is the normal configuration).

RealClear® reveals narcotics in a bottle and bomb components in real time, without lags and delays. autoScale® displays contents at Pentium 4 resolution automatically and without distortion.

Control Screening is the leading worldwide producer of fast, reliable and sophisticated X-ray, Metal and Trace Detection screening systems.

Ask about our mobile and other systems. Our advanced systems and options are often integrated, leased or rented.

The AUTOCLEAR® 2002200 (featuring a 2.0 m wide x 2.2 m high or 78.7" wide x 86.6" high tunnel opening), is a heavy-duty, conveyORIZED, X-ray scanners designed for screening cargo and large checked luggage, detecting concealed weapons, explosives, narcotics, currency, contraband or manifest fraud at:

- Airports • Seaports
- Customs • Corporate Facilities
- Government Facilities
- Checkpoints • Loading Docks
- Mailrooms • Cruise
- Warehouses • Nuclear
- Access Control • Special Events
- Rail or Bus Stations
- Borders • Military Sites

Features

Low to the floor, very heavy-duty, high capacity motor roller conveyor with easy changeouts. Extremely rugged frame construction uses less floor space and head room.

Parcel contents are displayed at normal scale, wherever located, automatically and without distortion (autoScale®). RealClear® function reveals components of dense items in realtime without lags or delays.

Features Pentium 4, 17" monitor, Multi-Energy Color with Organic/Inorganic Stripping, RealClear®, autoScale®, autoDensAlert®, autoOutline®, autoSensing®, autoCal®, Lighten, Help, DensityScan, and Low Density Stripping, among other features.

TIP, Training and Image Archiving also available. autoMatalert®, option highlights suspect materials using atomic number and density.

autoSensing® eliminates the need for troublesome photosensors or footpad switch. Assures 100% screening of thin blades or plastique in courier envelopes or magazines, or of bag already in tunnel at start-up.

Interactive training and highly responsive local service. Engineered, made and rigorously tested in the USA to ISO 9001 and regulatory standards.

Celebrating 65 years of excellence in design & support
