

Table Top X-Ray Scanner

The all new **MAILGUARD™** letter and small package X-ray security screening system is a compact unit designed for desktop operation, 22.5" wide x 23.5" deep x 30.5" high (57.2cm x 59.7cm x 77.5cm).

The **MAILGUARD™** is ideally suited for the rapid detection of contraband materials in:

Mailrooms • Corporate Offices • Embassies
Prisons • Executives' Residences • Courtrooms

or anywhere that suspect material must be screened and detected.

PRODUCT FEATURES:

- Higher penetrating, more efficient & reliable 90kV X-ray source

X-ray image as seen by viewer

- Extra fine grain resolution, for the sharpest picture.
- Larger overall compartment size - 21" x 18" x 14" (53.3cm x 45.7cm x 35.6cm) - than other models with similar external dimensions and weight
- The **MAILGUARD™** operates with the simplicity of a small office copier. Through advanced technology, the **MAILGUARD™** is only 30.5" (77.5cm) high and weighs less than other machines with similarly sized chambers. This design greatly increases the screen brightness without loss of detail.
- Over 400 items can be examined per hour. Standard envelopes can be examined in batches of 200 to 500 at a time
- The **MAILGUARD™** is completely radiation safe and designed for an office environment. There are no moving parts to maintain. A standard wall socket is all that is required and installation is as easy as plugging it in.
